(57) **ABSTRACT**

A push broom head includes a body including an upper face, a lower face, a front face, a rear face, and left and right end faces. A plurality of sweeper bristles project outwardly from the lower face. A handle mounting block portion includes a socket adapted to receive an associated broom handle. The handle mounting block portion is located between left and right portions of the body. The body includes a plurality of open pockets defined in the upper face on both the left and right portions of the body. Each of the pockets opens through the upper face of the body and comprises a bottom wall. Each of the pockets defines a depth between the upper face of the body and the respective bottom wall.
